# PROFILE | SINCE 2005 COMPANY

■ ShengQi Technology is a scientific and technological enterprise integrating technology innovation, material research and development, product design, production, sales and service. Main production line including: PP、PE stationery products, 3D lenticular materials ( PET / PP) and printing products, multi-functional environmental protection materials and catering cup lid ( PET / PP) products, injection product and storage products, PET environmental protection recycling materials.

■ In December 2021, Jiangxi Shengqi Technology invested 300 million yuan in Xunwu, the company produce environmental protection new materials food packaging and other products, with an annual capacity of 20,000 tons.

■ At present, Jiangxi Shengqi Technology is one of the earliest enterprises in China to realize the whole industrial chain from the production of raw materials and finished materials of new environmental functional materials to deep processing into various environmental functional products. With strong technical strength, huge capacity advantage, stable and excellent quality and good after-sales service to win market recognition.

■ Through the continuous development in recent years, ShengQi Technology has been continuously improved in research and development, production, sales, management, talent reserve, information and automatic management. Facing the opportunity and challenge of the development of the times, ShengQi Technology come up with the business positioning of "leading the industry development, creating a century-old foundation", adhering to the business philosophy of "scientific and technological innovation and value creation", ShengQi Technology will continue to explore professional fields in the future, and apply functional new materials to industry, agriculture, education, science and technology and other fields more widely. Together with customers and partners, we will jointly open a better future on broader platform.
